Job Experiences

Sr. Web Developer

July 2023 – Present

Tribha Digital Solutions Pvt Ltd. | Hyderabad, India

As a Senior Web Developer at Tribha Digital Solutions, I started by handling full-stack development across websites, web applications, and mobile applications. Over time, I transitioned into a leadership role, training junior developers and leading a team of six. My responsibilities expanded to include architecting applications, managing client interactions, resolving technical issues, handling server setups, overseeing code migrations, and managing version control with Git.

Roles & Responsibilities

- Develop and manage WordPress-based websites, including custom theme and plugin development.
- Architect and implement scalable application flows and database structures.
- Lead front-end and back-end development for web applications, ensuring seamless integration and performance.
- Develop and optimize mobile applications tailored to client needs.
- Troubleshoot and resolve bugs, ensuring system stability and reliability.
- Oversee server setup, deployment, and code migration for smooth project execution.
- Engage with clients to understand project requirements and deliver tailored solutions.
- Train and mentor team members, improving their technical skills and code quality.
- Integrate third-party APIs, including payment gateways, WhatsApp Business API, and SMS gateways, to enhance application functionality.

Sr. Web Developer

May 2022 – June 2023

Chevronne Softech Pvt. Ltd. | Hyderabad, India

At Chevronne Softech, I worked as a Senior Web Developer, serving as the sole developer responsible for both frontend and backend development. I successfully designed and developed four in-house applications, including CRM systems and frontend websites, while integrating various APIs to enhance system functionality.

Roles & Responsibilities

- Developed and maintained frontend and backend applications based on business requirements.
- Integrated WhatsApp API for seamless communication automation.
- Implemented Tata Cloud Phone API for cloud-based telephony solutions.
- Integrated Asterisk Call API for VoIP and call management systems.
- Developed and integrated payment gateways for secure transactions.
- Configured email piping to automate inbound email processing.
- Identified, debugged, and resolved application issues to ensure stability.
- Designed and structured databases to support application scalability and performance.

Website Developer & Programmer

Feb 2017 – May 2022

Crenov8 DMCC | Dubai, UAE

At Crenov8 DMCC, I worked as a Website Developer and Programmer, responsible for designing and developing websites based on client and management requirements. I handled a mix of in-house and client projects, ensuring high-quality development and seamless functionality.

Roles & Responsibilities

- Designed and developed websites tailored to client specifications and business needs.
- Developed and maintained APIs for web applications.
- Created and customized WordPress themes and plugins to enhance website functionality.
- Provided ongoing maintenance for web applications and WordPress websites.
- Managed web hosting and domain services, ensuring uptime and security.
- Designed branding materials, including logos, flyers, and brochures.
- Oversaw server room maintenance and IT support, troubleshooting issues as needed.
- Administered MS Office 365, managing email accounts and licenses.

Graphic Designer cum Administrative

Feb 2016 – FEB 2017

Ibtikarat Engineering Industries | Ras Al Khaimah, UAE

At Ibtikarat Engineering Industries, I worked as a Graphic Designer & Administrative Assistant, handling both creative design tasks and administrative responsibilities. My role involved developing branding materials and managing essential business operations.

Roles & Responsibilities

- Designed logos, flyers, brochures, and business cards to enhance brand identity.
- Managed administrative tasks, including accounts preparation and auditing.
- Created and processed invoices and payrolls, ensuring accurate financial documentation.

Sr. Web Designer

March 2014 - Jun 2015

Crazy Designers | Hyderabad, India

At Crazy Designers, I worked as a Senior Web Designer, responsible for creating websites based on client requirements and leading a small team. I also engaged in client meetings to gather project specifications and provided technical support for web hosting and domain management.

Roles & Responsibilities

- Designed and developed websites tailored to client needs.
- Converted PSD designs into responsive HTML5/CSS3 layouts.
- Performed website maintenance to ensure smooth functionality.
- Managed web hosting and domain configurations for client websites.
- Led and mentored a small team, improving workflow efficiency.
- Conducted client meetings to collect project requirements.
- Provided technical support for website and hosting-related issues.

Web Designer and SEO Specialist

Jun 2013 – Feb 2014

Abd Software Technologies | Hyderabad, India

At Abd Software Technologies, I worked as a Web Designer & SEO Specialist, primarily handling in-house projects. My role involved designing and maintaining websites while implementing SEO strategies to enhance search rankings and online visibility.

Roles & Responsibilities

- Designed and maintained in-house websites, ensuring functionality and user experience.
- Implemented SEO on-page optimization to improve website performance.
- Managed SEO off-page submissions, including link-building and content outreach.
- Conducted SEO audits, competitor analysis, and organic search analysis.
- Handled domain and hosting maintenance, ensuring smooth website operations.
- Performed website maintenance, resolving technical issues and optimizing performance.
